

# Daily wide body services to Beijing

**Access northern China with Qantas Freight's daily services to the Chinese capital**

Qantas Freight now offers daily wide body freight capacity between Melbourne and Beijing.

The new service to the Chinese capital is operated using Jetstar's containerised A330-200 aircraft.

The outbound service from Melbourne offers a mid-day departure and early morning, same day arrival into Beijing.

Quality trucking services are available for destinations in northern China beyond Beijing.

The return service departs Beijing in the early morning and is timed to enable connection with most other Qantas and Jetstar services operating via Singapore to and from Australia, New Zealand, UK and Europe. Links to and from other Asian destinations are also available with Jetstar Asia.

With the addition of Beijing and, from December, Guangzhou to its network, Qantas Freight will offer services to 10 ports in greater China, including Hong Kong, Shanghai, Gulin, Haikou, Hangzhou, Macau, Ningbo, and Shantou.
