Qantas Header and Footer for 3rd party sites

1.1   Introduction

We have implemented a header and footer for 3rd parties to include on their pages. This allows 3rd party site to always have the latest Qantas.com navigation and saves a lot of time not having to coordinate changes made the header/footer with all parties. Any changes made by us are immediately visible on the sites that include the header/footer snippets.

1.2   Implementation

URLs

http://www.qantas.com.au/travel/layout/header

And

http://www.qantas.com.au/travel/layout/footer

Secure:

https://www.qantas.com.au/travel/layout/header

And

https://www.qantas.com.au/travel/layout/footer

All you need to do is create 2 Iframes and have them point to the above URL's as so:

<iframe frameborder="0" scrolling="no" width="1000" height="145" src="http://www.qantas.com.au/travel/layout/header"></iframe>

Example frame: G:\Groups\E-Comm\OLS\A1Design\Design_Documents\Coding_Standards\files\frame.html

Tracking

please also add tracking to your pages as the header/footer doesn't have tracking on it:

<!-- SiteCatalyst code version: H.1.

http://www.omniture.com -->

<script language="JavaScript" type="text/JavaScript">

var _path="//www.qantas.com.au/js/sitecatalyst.js";

var _js=('<sc'+'ript language="JavaScript" src="'+_path+'"></scr'+'ipt>');

document.write(_js);

</script>

<script language="JavaScript"><!--

_____

```
/* You may give each page an identifying name, server, and channel on the next lines. */

s.pageName=""

s.server=""

s.channel=""

s.pageType=""

s.prop1=""

s.prop2=""

s.prop3=""

s.prop4=""

s.prop5=""

/* s.prop7 is set to document.title by Shub on 04.11.05 */

s.prop7=document.title;

/* E-commerce Variables */

s.campaign=""

s.state=""

s.zip=""

s.events=""

s.products=""

s.purchaseID=""

s.eVar1=""

s.eVar2=""

s.eVar3=""

s.eVar4=""

s.eVar5=""

/************* DO NOT ALTER ANYTHING BELOW THIS LINE ! *************/

var s_code=s.t();if(s_code)document.write(s_code)//--></script>

<script language="JavaScript"><!--

if(navigator.appVersion.indexOf('MSIE')>=0)document.write(unescape('%3C')+'\!-'+'-')

//--></script>

<!-- End SiteCatalyst code version: H.1. -->
```

1.3 Extras

We have also added the ability to highlight a particular menu item to achieve something like this:

_____

This is done by passing to parameters in the header query:

http://www.qantas.com.au/travel/layout/header?**menuItem1**=Flight%20Info&**menuItem2**=Timetable

Please note that it is recommended that you replace any spaces by %20 - Flight%20Info

Pages with no LeftHand menu

If you wish to have a full width page and remove the little grey area you can do this by setting a parameter as follows:

noSidePanel=true

ie: http://www.qantas.com.au/travel/layout/header?noSidePanel=true

Extracting the Qantas Frequent Flyer number

We have also added a param to allow the extraction of the FF number by a third party if the user is logged in:

&showFFNumber=true

Ie: http://www.qantas.com.au/travel/layout/header?showFFNumber=true

This writes out to the page:

<input type="hidden" name="fflyer_number" id="fflyer_number" value="6142102">

Getting the Marketing region

I have also added the marketing region in a hidden field:

<input type="hidden" name="marketing_region" id="marketing_region" value="au">

List of all Available parameters

Header:

http://www.qantas.com.au/travel/layout/header?**menuItem1**=<itemName>&**menuItem2**=<itemName>&**siteId**=<siteId>&**showMenu**=<0 or 1>

Definition of the request attributes

_____

Request attribute Name	Required?	Definition	Valid Values
menuItem1	Mandatory	Controls the display and highlighting of the menu item A	Menu item A display text
menuItem2	Mandatory	Controls the display and highlighting of the menu item B	Menu item B display text
siteId	Mandatory	Unique Qantas identifier of the Third-party site.	Third party site's URL.
noSidePanel	Optional	Control the display of the grey bar on the left menu for third party.	Any value. Default value is empty
showMenu	Optional	Controls the display and highlighting of the menu item A and menu item B	0 :Hides the menu A and menu B 1 :Shows the menu A and menu B Default Value : 1
region_change	Optional	Switches the region	Valid values. AU,AM,EU, SP, AS,AF Refer to region selector
country_change	Optional	Switches the country	Refer to region selector
locale_change	Optional	Switches the locale	Refer to region selector
showSearch	Optional	Show/hides the search box	0 = hidden | 1 = show

In order to change language, you will need to override the region and country as so:

http://www.qantas.com.au/travel/layout/footer?locale_change=zh&country_change=cn&region_change=as

Footer Include

http://www.qantas.com.au/travel/layout /footer? *siteId*=<siteId>

Definition of the request attributes

Request attribute Name	Required?	Definition	Valid Values
siteId	Mandatory	Unique Qantas identifier of the Third-party site.	Third party site's URL.
